

Greetings, Milton D. Frog, here, with the latest news from Parma Hobby.

Spring is finally upon us, Mother's Day is Sunday, May 9th and I'll be working in my garden railroad REAL soon.

This past week was our 15th Annual AutoFest and Sunday was the awards presentation. We had some really great entries this year.

Photos of the winning models and the contestants have been posted on our website. Click on this link and have a look:

<http://www.parmahobby.com/plastic-models/autofest/winners-circle-2010.htm>

The 2010 AutoFest winners were:

Junior's Division:

- 1st Place: Mark Stelma ---- John Player Special
- 2nd Place: Chris Senyitko ---- 1970 Coronet
- 3rd Place: Carmen Marchetti ---- 1953 Studebaker

Best of Show:

Chris Senyitko ---- 1948 Lincoln

RMX85-6522
Red Knight of Vienna

RMX85-6523
Black Knight of Nurnberg

Both these kits are due in May (maybe) and their cost will be \$15.95 each.

As many of you probably heard, Hobbico picked up the exclusive distribution rights to Hasegawa Hobby Kits. We will be getting most of their releases as soon as they become available. Between March and June of this year, Hasegawa will be issuing many limited edition kits (meaning one time production) that offer changes in decals to previous issuances. Among these kits are :

- | | |
|------|---|
| 1/72 | Macchi c.202 Folgore Combe |
| 1/72 | Mitsubishi Ki51 Type 99 Assault/Tactical Recon. Plane Combo |
| 1/72 | Kawasaki T-4 "Blue Impose 2010" |
| 1/72 | Mitsubishi A6M2b/A6M3 Zero Fighter Type 21/22 "201 st Flying Group Combo |
| 1/72 | F/A-18E Super Hornet VFA-14 Tophatters Special |
| 1/72 | Messerschmitt Bf109G-6/G-14 "Hartmann Combo" |
| 1/72 | P-2H (P2V-7) Neptune "J.M.S.D.F." |
| 1/72 | F/A-18C Hornet "Golden Dragons CAG 2009" |
| 1/48 | Blue Impulse History (F-86F/T-2/T-4) |
| 1/48 | Mitsubishi F-2A "6 Sq. 50 th Anniversary" |

If there are any listed here, or on the Hasegawa website that you're looking for, contact us and we will make sure you're first to get it!

FLYING TIME AHEAD

PARMA HOBBY is this area's premier shop for all your flying needs! We have several of the newest airplanes and helicopters – either in stock or on pre-order with our suppliers. There are going to be several new and exciting airplanes coming for beginners, intermediates and the very experienced!

For the beginner:

FLYZONE SKYFLY MAX

This is a brushless, electric powered, radio controlled, ready to fly airplane from Hobbico, with a Tactic 2.4GHz Radio System. The Tactic TTX404 radio has 4-channels, with adjustable trims and four

micro servos, a 6-channel receiver, with elevator, rudder, throttle and aileron control. The Speed Control has auto cut-off. It comes with a Flyzone 1800mAh 11.1V LiPo and an ElectriFly 3S LiPo Balancing Smart Charger with AC/DC adapter. Wingspan on the SkyFly is 47".

RETAIL: \$249.99

OUR PRICE: \$199.99

Due Late May

For the Advanced Fliers:

Great Planes ElectriFly Evader Ducted Fan Sport Jet.

Electric powered, almost ready to fly jet for the truly adventurous!
The fuselage is made of fiberglass and comes with both military and sport decals, a ducted fan motor, 15' bungee for hand launches, a plywood stand and a fully detailed instruction manual.

The wingspan is 26.5" and weighs 28 – 30 ounces, and is 30.5" in length.

RETAIL: \$229.99

OUR PRICE: \$179.99

DUE LATE MAY

RESERVE YOURS TODAY AND GET IT THE MINUTE IT BECOMES AVAILABLE!

As an ARF, this plane will require the following:

- Radio: 4-channel with mini receiver
- Servos: Two 20 oz-in torque micro servos
- Electronic Speed Control: 35A for brushless motors
- Battery: Great Planes ElectriFly 14.8V (4S) 2200mAh 25C LiPo
- Battery Charger: LiPo compatible
- Building and field equipment

Need a suggestion for a great radio system? How about this?

2.4GHz FHSS Futaba 4YF 4-Channel Radio System
with the R2004GF Receiver. Transmitter and Receiver only, servos not included.

FHSS (Frequency Hopping Spread Spectrum) eliminates frequency pins and signal interference-pushbutton transmitter/receiver linking with no binding plugs
R2004GF receiver has coaxial antenna that can be positioned inside plane for optimum reception, Power Down Mode - reduces RF power for 90 seconds, simplifying ground checks for interference. All-channel servo reversing for more installation options. Power and servo reversing switches are located down and out of the way for convenience and to avoid accidental changes.

Retail: \$129.99

Our Price: \$99.99

Suggested Servos:

S3117 Servo Micro Hi-Torque

Our price: \$18.99

In stock now:

Two other great planes and deals for the experienced fliers!

BAe Hawk 15 DF ARF with Motor & Fan by E-Flite

An incredible combo offer now available from E-flite features the BAe Hawk 15 DF (EFL8025), the BL15 DF Brushless Motor (EFLM3015DF) and the Delta-V 15 69mm EDF (EFLDF15).

Only available for a limited time (or while supplies last). Only \$169.97!. which is \$100 off the price if each component were to be purchased separately. Call today to get yours while they're available!!!!

Extra 300 32e ARF by [E-flite](#)

Designed by veteran IMAC and XFC competitor, Mike McConville, the Extra 300 32e ARF is optimized to deliver unlimited 3D and precision aerobatic performance using the latest in brushless motor technology. And while it is IMAC legal, you don't have to be a competitive pilot to appreciate its incredible performance. Intermediate to experienced pilots will enjoy its "big plane" handling characteristics and gorgeous scale lines whether they're out for a trophy or simply out for a good time.

Retail: \$274.99

Our Price : \$199.99

Due Late May

Now for you heli pilots:

Novus CP N125 Sub Micro Helicopter from Heli-Max.

This is a brushless electric powered, 2.4GHz, 6 channel, radio controlled, micro helicopter that is Ready-to-Fly! The rotor head is collective pitch with a brushless 10,000 kv motor. The radio system is programmable with digital servos, dual rates and lacklit LCD screen.

It comes complete with a heading-hold gyro, a 3.7v 600 mAh LiPo battery and an AC wall charger.

The rotor diameter is 12", and it weighs a mere 3.2 ounces!

Retail: \$399.99

Our Price: \$279.99

Due Late May

Can't wait that long?

**Novus 125 CP Sub Micro RTF Helicopter
NOW IN STOCK !!!!**

This is the Heli-Max 2.4GHz radio controlled helicopter with collective pitch rotor head, a brushless 10000 kV motor, digital servos, 3.7V 600mAh LiPo battery, and a heading hold gyro. The 2.4 GHz radio system comes with digital servos, dual rates and backlit LCD.

Retail: \$399.99

Our Price: \$279.99

ROUND 2 Models, which purchased AMT, Polar Lights and MPC, has issued this bulletin for interested modelers. As you know, NASCAR models have been sparse this year because of a licensing spat between the manufacturers and NASCAR. This bulletin seems to indicate a potential for the production of more NASCAR models:

“On the creative side of things, we have been making great strides on our packaging for the NASCAR kits as well! So far, both the [Jeff Gordon](#) and [Dale Earnhardt Jr.](#) package designs have been licensor APPROVED, and are already at the factory to be printed – with instruction sheets soon to follow. In fact, we’re so happy about the progress – we’ve included a couple “sneak peeks” of the packaging and instruction sheets for you to check out! The [Jimmie Johnson](#) and [Mark Martin](#) package designs are also well on their way and looking good.

We should be wrapping things up soon and can't wait for the [NASCAR Snap it kits](#) to hit the shelves. Thanks for all your support, and happy modeling!”

See you soon, happy modeling

Milton D. Frog,

Bob, Sandy and Chris
